

11000 - EQUIPMENT

DESIGN

- A. Voltage for clothes dryers shall be 208/277.
- B. Washing machines must be bolted to slab embeds; and be provided with vibration isolators, as required. Any washing machines which are to be located on an elevated, structural slab must be analyzed for harmonic impacts in conjunction with the structural plans, and the appropriate vibration isolation or dampening provided.
- C. Coordinate design of exhaust flues for dryers with dryer manufacturer.
- D. Provide floor drains at all public restrooms and at laundry rooms.
- E. Coordinate voltages for washing machines and dryers between electrical plans, specifications, schedules, and disconnects.
- F. Equipment plans for any kitchen equipment must be closely coordinated with electrical power drawings to ensure consistency between power requirements and power provided.
